

Human **by** design. Powered by AI.

Building the AI layer that works for everyone—not
just the few who already know how.

Kochi, Kerala

Est. 2026

A Single Mission

To bridge the gap between everyday people and the tools that were always supposed to work for them.

We build AI products that don't require
a manual, **a degree**, or **a head start**.

Headquartered in Kochi, Kerala, India — Cre8ve AI Solutions is redefining human-centered intelligence for the global workforce.

Two builders. **One** belief.

Most AI companies are building for the technically empowered.

We're building for everyone else.

Cre8ve AI Solutions was born from a very personal observation: despite the explosion of AI tools, the average person still feels left behind—overwhelmed, underserved, or simply unable to translate AI's promise into something practical in their daily lives. We started this company because we've lived that gap from both sides.

"We've lived that gap from both sides."

03. The Foundational Synergy

THE BRIDGE

Prayaga translates complex strategy into something real and accessible. She spent a decade translating strategy into growth for brands and celebrity media. Now, she's translating AI.

THE FRONTIER

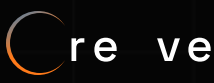

Inza builds the infrastructure that lasts. With a record scaling platforms to **\$1B Market Cap** and **500,000+ users**, he ensures the promise Scales.

A Majority Female-Owned Firm

This isn't a footnote—it's a founding principle.

"Building AI for everyone starts with building it from a perspective that includes everyone."

04. Mission, Vision & Values

OUR MISSION

To bridge the gap between everyday people and the transformative power of AI — building products that are intuitive, accessible, and genuinely useful for real people navigating real challenges.

OUR VISION

To become the most human-centered AI company in the world — where every product empowers ordinary people to do extraordinary things, regardless of technical background.

01. HUMAN-FIRST

Technology serves the person. Every decision starts with: "Does this make life easier for a real human?"

02. RADICAL ACCESSIBILITY

If you need a tutorial, it isn't finished. We build until it's obvious.

03. PURPOSEFUL INNOVATION

We don't build features. We solve problems. Real people, real needs.

04. WOMEN-LED EXCELLENCE

Diversity is a structural advantage. We ask different questions, so we build different solutions.

05. QUIET DETERMINATION

We don't announce—we deliver. The work speaks first and loudest.

The AI gap is **real**. We're closing it.

The tools today were built by engineers, for engineers. The average student, professional, or person navigating a hard season hasn't been handed a key—they've been handed a brochure.

"We're not building the smartest AI. We're building the most useful one."

At Cre8ve, we build the **layer in-between**. We take raw intelligence and turn it into something a job seeker in Kochi or a student in Lucknow can actually use to win.

DYNAMIC CONTEXTUAL INTELLIGENCE

AI Resume Builder

The job application process is broken. Tailoring a single application still takes 45–120 minutes—before ATS bots even filter you out.

- ✔ 2-Click Profile Sync (LinkedIn/Indeed/Naukri)
- ✔ Reverse-engineered ATS Matching (50+ Platforms)

Job-ready resume in under 2 minutes.

AI Companion App

Modern life is full—and full lives can be lonely. This isn't a chatbot; it's an adaptive pocket companion for your mental well-being and productivity.

- ✔ Emotional-State Adaptive Responses
- ✔ Intelligent Focus & Productivity Sessions

More than a list—a companion that grows with you.

COMING SOON

Agentic Job Applying Engine

The next step after optimization. An autonomous agent that tailors each application and submits to 50+ portals daily on your behalf—while you sleep.

The Scale Trap

Closes the consumer loop by moving from "Preparation" to "Action."

IN CONCEPT

NEET / JEE Prep App

Levelling the playing field for millions of Indian students. AI-powered preparation that combines adaptive learning with personalized coaching.

Democratic Access

World-class prep for students in tier-2/3 towns where coaching is out of reach.

P

Prayaga

DIRECTOR & CEO

Translating strategy into Human Connection.

With a decade of experience across branding, marketing, and business development, Prayaga has worked across India's most dynamic industries—from healthcare to celebrity influencers.

At Neerozhukkil Vaidyasala and Saina Infotainments, she specialized in growing brands from the ground up and building new pathways for growth. Her core strength is translating complex strategy into something real and accessible.

VISIONARY OBJECTIVE

"Ensure every product we build stays grounded in genuine human need."

Architecture built for Hyper-Scale.

Operating at the frontier of Web3 and AI since 2016, Inza builds systems that don't just work—they scale globally.

Previously scaled BXH to \$1 Billion Market Cap and grew Bytex.io to 500,000+ users. At Cre8ve, he oversees the engineering and operational backbone that makes our mission permanent.

TEAM DYNAMICS

"Our entire tech, marketing and sales teams are handled entirely using AI."

Inza

CO-FOUNDER, COO & CTO

We're building AI for everyone.

Join us.

Whether you're a job seeker, a student, or a partner who believes in what we're building — there's a place for you in the Cre8ve ecosystem.
